LOCAL BUSINESSES EMPOWERED FOR SUSTAINABLE GROWTH

Ten local entrepreneurs have graduated from our Enterprise Development Programme, a proud milestone for them and for the community they serve.
Among the graduates is Mokev Stemcellence Centre, which joined the Business Capacity Programme in 2022 and completed the full three-and-a-half-year journey. Their dedication shows what steady commitment can achieve.

The programme gives entrepreneurs funding, mentorship and business development support so their businesses can grow stronger and keep creating value close to home.

SUPPORTING COMMUNITY SPORT AND YOUTH DEVELOPMENT

Through our Hearts and Minds Initiative, we provided sporting equipment to three community organisations. Siyathemba Football Club received soccer equipment and team kits, while Eagles Netball Club received netball kits, balls and netball poles. Ko Kasi Festival in Olifantshoek received balls, medals, trophies and water to support its community sporting activities.

"The aim of this initiative is to create opportunities for young people to develop their sporting talents and strengthen community unity. Supporting these organisations is an investment in our communities' wellbeing and future."- Nomfundo Mpompo.

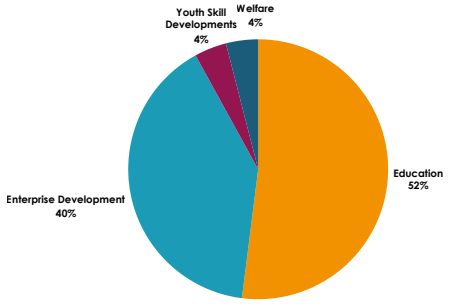

TABLES AND CHAIRS IMPROVE LEARNING ENVIRONMENT

We were proud to donate much-needed tables and chairs to Langberg High School and Kathu High School, helping to create a better learning environment for learners and educators alike.

Through this support, we aim to help create more comfortable and conducive spaces where learners can focus on their studies and educators can teach effectively.

The initiative forms part of our ongoing commitment to education development, helping local schools meet learners' needs and strengthening access to quality learning opportunities.
